

“Meet iDrop” Video
Transcript of Audio Track

Recently we challenged ExchangesConnect members to create a mascot that represents international cultural exchange and understanding.

Members from all over the world contributed and today we are announcing the winning entry.

iDrop!

iDrop was created by Giorgi, an Exchanges Connect member from Republic of Georgia.

Giorgi selected the image of a water drop because it represents each one of us.

Alone, each of us is just one in nearly 6.7 BILLION people living on this planet.

But just like drops of water can join together to form streams, rivers, and oceans, we can increase our own strength by connecting with others across the globe.

iDrop is going on an adventure soon, traveling around the world, meeting new people, and making friends.

It's the “Where in the World is iDrop?” Challenge!

Visit iDrop's profile page now to become friends with him. iDrop's friends will be able to follow him on his journey and participate in an upcoming challenge to guess his travel destinations. So “friend” iDrop today and stay tuned to connect.state.gov for more details on the exciting “Where in the World is iDrop?” Challenge.
